

## How-To for streaming

Both NanoXX receivers must use a valid IP-Address within your network. They need to be connected and switched on.

### NanoXX Master-Box

- Menu -> Multimedia ->Network ->IP Stream
- Video Streaming: **Master**
- Home Streaming: **On**
- Target IP Address: **IP of the NanoXX slave box**
- Target IP Explorer: **Connect**

Confirm settings with the red key.

ROUTER / SWITCH

### NanoXX Slave-Box

- Menü -> Multimedia ->Network ->IP Stream
- Video Streaming: **Slave**
- Home Streaming: **ON**
- Target IP Address: **IP of the NanoXX Master box**
- Target IP Explorer: **Confirm Connect with OK**

The files on the NanoXX Master box's USB HDD are now displayed. Select the required file and confirm with OK.
